PROFESSIONAL SUMMARY

Analytically strong MCA student at Alliance University, Bengaluru (CGPA: 8.6) with solid foundations in probability, statistics, linear algebra, and machine learning fundamentals. Hands-on experience building and evaluating ML models, working with real-world datasets, feature engineering, and large-scale data processing using Python, SQL, and Pandas. Demonstrated academic and project experience in applied machine learning and data-driven problem solving. Eager to join **Zepto** as a **Data Scientist I – Last Mile** to contribute to ML-driven solutions that optimize last mile delivery operations at scale.

TECHNICAL SKILLS

- **Machine Learning & Data Science:** Python, Scikit-Learn, ML Model Building, Model Evaluation, Feature Engineering, Predictive Modeling, K-Means, Regression, Classification, EDA
- **Statistics & Mathematics:** Probability, Statistics, Linear Algebra, Statistical Analysis, Hypothesis Testing, Data-Driven Problem Solving
- **Data Processing & Engineering:** Pandas, NumPy, SQL, MySQL, MongoDB, ETL Pipelines, Large-Scale Data Processing, Data Cleaning, Data Transformation
- **Visualization & Reporting:** Power BI, Matplotlib, Seaborn, Dashboard Development, Data Storytelling
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, VS Code, Eclipse, HTML, CSS, JavaScript, C++, Java

EDUCATION

Alliance University <i>Master of Computer Applications (MCA)</i> CGPA: 8.6	Bengaluru, Karnataka 2024 – 2026
---	-------------------------------------

The Bapatla College of Arts & Sciences <i>Bachelor of Science (B.Sc)</i> CGPA: 7.9	Bapatla, Andhra Pradesh 2019 – 2022
---	--

Narayana Junior College <i>Intermediate / Higher Secondary Certificate (HSC)</i> CGPA: 9.3	Vijayawada, Andhra Pradesh 2017 – 2019
---	---

Loyola High School <i>Secondary School Certificate (SSC)</i> CGPA: 9.7	Bapatla, Andhra Pradesh 2016 – 2017
---	--

PROJECTS

E-Commerce Sales Analysis	<i>Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Power BI</i>
----------------------------------	--

- Analyzed a 25K-row real-world e-commerce dataset using Python and SQL to uncover key revenue trends and customer segments.
- Applied feature engineering, statistical analysis, and EDA to derive actionable insights – directly mirrors Zepto’s large-scale data processing needs.
- Built interactive Power BI dashboard visualizing KPIs – applicable to Zepto’s last mile delivery performance analytics.

Volunteer Management System	<i>Data Structures, Algorithms, C++/Java, GitHub</i>
------------------------------------	--

- Implemented advanced data structures and algorithms to efficiently manage, segment, and assign volunteers at scale.
- Demonstrates strong problem-solving fundamentals and algorithmic thinking – core Data Scientist requirements at Zepto.

Smart Meal Planner	<i>Java, OOP, MySQL, Eclipse</i>
---------------------------	----------------------------------

- Built a Java + MySQL application using OOP principles and structured data management for scheduling and optimization logic.
- Demonstrates ability to build data-driven applications with structured database design and retrieval.

Netflix Landing Page Clone	<i>HTML, CSS, Frontend Development</i>
-----------------------------------	--

- Designed a fully responsive frontend clone demonstrating strong UI development and web technology skills.

CERTIFICATIONS

- Microsoft Applied Skills: Azure AI (**Microsoft**) | Python Project for Data Science (**IBM**)
- Data Analysis with R (**IBM**) | Introduction to Databases (**Meta**)
- Unordered Data Structures (**Coursera**) | HTML, CSS & JavaScript for Web Developers (**Johns Hopkins University**)

HONORS & AWARDS

- Engaged in workshops conducted by **ISACA** to enhance technical knowledge – 2025.
